- **Backend Frameworks**: Strapi
- **DevOps**: Github, Docker, MySQL, CircleCI, Vercel
- **CMS**: Drupal 7 -> 10

## Work History

### Frontend developer | Ellipsis Agency

*05/2022 - Present*

### Frontend developer | ViaVictor

*02/2021 - 05/2022*
Most of my time here I was working on an Angular project for the city of Antwerp. Aside from that big project I helped build React projects for diverse clients.

### Javascript developer | Studio Hyperdrive

*01/2019 - 01/2021*
I started with zero experience in Javascript and they gave me the chance to learn it and help me to understand the Angular framework by doing projects for the city of Antwerp.

### PHP developer | District01

*07/2015 - 12/2018*
At the start of my developer career my focus was on Drupal 7 & 8. As a junior developer I had the opportunity to work on site for great companies like Bayer and Ketnet.
